MANAGEMENT

**ECS 564 MJ : Essentials of Cloud Computing and Security  
(2024 Pattern) (Semester - II)**

**Time : 2 ½ Hours]**

**[Max. Marks : 50**

**Instructions to the candidates :**

- 1) All questions are compulsory.
- 2) All questions carry equal marks.

- Q1) a)** Explain how security policies are implemented in cloud computing. [5]
- b) Describe network - level security and its role in cloud infrastructure. [5]

**OR**

- c) Define the concept of cloud Information Security. Explain its significance in cloud computing. [5]
- d) Describe the concept of AAA (Authentication, Authorization, and Accounting) in cloud access management. [5]

- Q2) a)** Explain the steps for creating and deploying a web application using AWS Elastic Beanstalk. [5]
- b) What is an omni cloud? How does it differ from a multi - cloud environment. [5]

**OR**

- c) Difference between cloud computing and Grid Computing . [5]
- d) What is cloud AI? Explain its role in transforming cloud services. [5]

**P.T.O.**

- Q3)** a) Describe the key components of a block chain and their roles. [5]  
b) Explain how Edge computing enhances real time processing in IoT applications. [5]

**OR**

- c) Solve the below case-study with appropriate explanation. IBM Food Trust uses blockchain technology to provide end-to-end supply chain transparency in the food industry. [10]

How blockchain improves food safety, reduces waste, and enhances trust among stakeholders.

- Q4)** a) What is commoditization of data centers? Describe its role in cloud computing. [5]  
b) Discuss the impact of automation and standardization in cloud optimization. [5]

**OR**

- c) What is resource pooling in cloud computing. How does it benefits cloud server providers & users. [5]  
d) Evaluate different Resource Sharing models and their impact on cloud cost efficiency. [5]

**Q5)** Write Short Notes. (Any Two) [10]

- a) Application hosting in GCP  
b) Cloud Migration  
c) Key factors for selecting cloud provider  
d) Common deployment models
