F.Y. M.C.A. (Management)

CCM-560 MJ : CLOUD COMPUTING MANAGEMENT  
AND SECURITY

(2024 Pattern) (Semester - II)

Time : 2½ Hours]

[Max. Marks : 50

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) All questions carry equal marks.

**Q1)** a) Define Quality or Service (QoS) and its importance in cloud computing. [5]

b) Define cloud security and explain its significance in cloud environments. [5]

OR

c) Explain the stages of Data Migration in cloud environments. [5]

d) Explain how Multi-Factor Authentication (MFA) enhances access security. [5]

**Q2)** a) Define Data Warehousing and explain its components with suitable diagram. [5]

b) Define a cloud-native file system and its significance in cloud computing. [5]

OR

c) Define high-performance data processing and its importance in big data analytics. [5]

d) Discuss how graph database models in Amazon Neptune differ from traditional models. [5]

P.T.O.

- Q3)** a) Define Virtual Private Network (VPN) and its role in cloud security. [5]  
b) Describe the key components of Identity and Access Management (IAM). [5]

OR

- c) Discuss the role of Intrusion Detection and Prevention System (IDPS) in cloud environments. [5]  
d) Explain the role of AWS Key Management Service (KMS) in cloud security. [5]

- Q4)** a) What are the key steps in Disaster Recovery Planning and Execution? [5]  
b) Describe the different types of database backups available in AWS. [5]

OR

- c) Solve the following case study with appropriate explanation.  
A financial services company faced a data breach when their AWS RDS backups were publicly exposed due to misconfiguration of S3 Bucket policies. How can IAM policies and encryption improve backup security? [10]

- Q5)** Write short notes (Any Two). [10]

- a) Amazon Light sail.  
b) AWS EC2 Autoscaling.  
c) AWS Lambda  
d) Amazon EC2.
